

To start with,

Tropical Climate

- Location: between Tropic of Cancer and Tropic of Capricorn
- Temperature: Hot all year
- Biomes: Tropical rainforest, desert

Paragraph 2

Paragraph 3

In addition,

Temperate Climate

- Location: between Tropic of Cancer & Arctic Circle, and between Tropic of Capricorn & Antarctic Circle
- Temperature: changes season to season
- Biomes: Coniferous Forest, Deciduous Forest, & Temperate Rainforest

Paragraph 1 (Introduction)
There are three types of climate on Earth. Climate is the usual weather of a place.

Also,

Polar Climate

- Location: North Pole (above Arctic Circle) & South Pole (below Antarctic Circle)
- Temperature: Cold all year
- Biomes: Tundra

Paragraph 4

(Conclusion) Paragraph 5

In conclusion,

Earth has a tropical climate,

temperate climate, and polar

climate.

Types of Climate on Earth

Paragraph 1:
Introduction

There are three types of climate on Earth. Climate is the usual weather of a place.

Paragraph 2:

1. Intro category
2. Location
3. Temperature
4. Biomes

To start with, there is the tropical climate. This climate is located between the Tropic of Cancer and the Tropic of Capricorn. The temperature of the tropical climate is usually hot all year. Biomes in the tropical climate include the tropical rainforest and the desert.

Paragraph 3:

1. Intro category
2. Location
3. Temperature
4. Biomes

In addition, there is the temperate climate. This climate is located between the Tropic of Cancer and the Arctic Circle, and between the Tropic of Capricorn and the Antarctic Circle. The temperature in this climate changes from season to season. Biomes in the temperate climate include the Coniferous Forest, the Deciduous Forest, and the Temperate Rainforest.

Paragraph 4:

1. Intro category
2. Location
3. Temperature
4. Biomes

Last, there is the polar climate. This climate is located above the Arctic Circle and below the Antarctic Circle. The temperature in this climate is cold all year. The biome in the polar climate is tundra.

Paragraph 5:
Conclusion

In conclusion, Earth has a tropical climate, temperate climate, and polar climate.
